

SWEET PROGRAM

# SMARTSIX

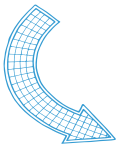

# SMARTSIX

Creating space designed for high-mobility or focused around children can be challenging! The ability to specify durable furniture and maintain creativity is no easy task. No worries, we've got you covered! Our "SMARTSIX" program makes it easy to select fun shapes while keeping durability and costs in check.

First, define the space where the pieces will be going. If they will be used "as toys," upholstery is highly recommended\*. Next, choose our FlexPlus™ coating, Molded PE or textile of your choice (must be approved - some shapes are tricky - talking about you puzzle). Finally, pick those shapes!

1. **DEFINE** USAGE TYPE (TOY OR FURNITURE)
2. **SELECT** MATERIAL / COLOR
3. **SELECT** SHAPE(S)
4. **CELEBRATE!**

\*FlexPlus™ coated shapes placed in environments where they'll be used as "toys" will carry a (1) year warranty. We stand by our product 100%, this application is not suitable for FlexPlus coating. We recommend a high double rub material.

\*available with zipper instead of wood base
