Take our love for materials and mix in our fascination for how people work and the manner in which they collaborate, and it's clear why we're so passionate about SIXINCH **. Our roots have always been in upholstery and with the addition of coated foam, we're able to expand our materials story and bring a fresh look to the world of furniture design.

CLIFFY + STEEN

We build iconic environments that are distinctly original. Our team of designers and engineers are detailed to a fault. We have the ability to not only "dream" but also "do". Every piece that bears the SIXINCH label is held to the highest standards in the furniture industry.

We have worked with several household brands and educational institutions to provide some of the most unique, breath-taking furniture in existence.

COLOR REACTOR PRIMER FOAM

FlexPlus™

FlexPlus[™] coating provides options beyond traditional upholstery and is the brand's key differentiator. FlexPlus is made up of three layers; polyurethane primer, polyurethane reactor (A/B), and color coat. The end product is rated for high-traffic areas and is 100% waterproof – use it indoor or outdoor!

Upholstery

Extensively trained and highly skilled, our thread artisans pour unparalleled craftsmanship and love into each product we produce. With our wide range of abilities and offerings we challenge you to find a better manufacturer. We have been upholstering for 30+ years with the highest standard of quality and process. Working with your own fabric? No problem, we specialize in material flexibility. Choose your path and let us assist you as a creative and manufacturing partner.

Molded PE

When you need a material capable of withstanding anything the environment can throw at you, look no further than Molded PE. Fully heat and UV stabilized, our Molded PE products won't warp or crack under extreme conditions. Have a high impact environment? Molded PE can take it - all while being easy to pick up and move. Accessorize your Molded PE piece by adding a Remote Controlled LED Lighting kit. Our kits are engineered to keep exterior and interior use in mind

Visit sixinchusa.com for more information regarding product durability and cleanability.

The design flexibility of SIXINCH coated foam is almost limitless, and that's exactly why this technique is perfect for custom projects. There are no molding or set up costs. We start from a large foam bun which is CNC cut into the desired shape. Our FlexPlus™ coating is applied and the entire color spectrum is at your disposal. When completed, your product is a flexible, weather-resistant, seamless design statement.

CUSTOM FURNITURE IS A
TOUCHY TOPIC FOR MOST IN
THE INDUSTRY — NOT US.

Wrapz are a creative way to infuse your design into contract furniture. Our custom printed furniture allow creators to use their brand visuals on specified SIXINCH™ furniture pieces. Wrapz are perfect for educational spaces.

The administrative staff works hard behind the scenes to ensure everything runs smoothly.

Assisting parents, organizing school communications, following up on absences, and managing staff is all in a day's work. These staff members require a resourceful use of multi-functional furniture with a light, clean aesthetic that doesn't overpower a space.
